WEATHER—Fair and Warmer

No. 191

Warm Weather Is All That Is Needed Now to Ensure a Record Crop

Grain Is Filling Out Rapidly and Bumper Yield Is Assured in All Parts of Edmonton District

REPORTS FROM DIFFERENT SECTIONS ARE OPTIMISTIC

FARMERS ARE COMPLETING ARRANGEMENTS FOR HARVEST WHICH WILL COMMENCE IN MANY LOCALITIES THIS WEEK—CANADIAN NORTHERN REPORTS SHOW CONDITIONS IN CENTRAL ALBERTA.

All that is now required for a successful harvest through the west is warm, bright weather to mature the grain. This is what farmers everywhere are hoping for. Growth since seed time has been steady and rapid until at the present time about 90 per cent of the grain is out in head and ready. There is an abundance of moisture in the ground for all requirements and the warm rays of the sun are now needed to turn the fields from green to yellow.

Reports received from various sections of Alberta indicate that in one or two instances there has been almost too much rain for the good of the crops. The toner of practically all the reports, however, is highly optimistic. Farmers everywhere are looking for a bumper crop and are making all necessary preparations to harvest it.

Following are a number of crop reports received at Edmonton from stations along the C.N.R. in Alberta. The majority of them are dated July 27th:

(Continued on Page Five.)

BRITISH JOURNALISTS COMING NEXT MONTH

PARTY, CONSISTING OF NEARLY TWO HUNDRED OLD COUNTRY NEWSPAPERS, SAIL FROM LIVERPOOL ON FRIDAY—ARRIVE EDMONTON, SEPTEMBER 19.

One hundred and eighty newspaper men distinguished in the field of British journalism will be entertained in Edmonton by the provincial government board of trade on September 18th. The program of the itinerary of the party of British editors has just been received by J. Blane, secretary of the Canadian club, and gives names of a long list of prominent men from the principal cities and towns of the smaller towns of Eastern and Western Canada, and occupy a couple of months.

The party will embark on the Victoria, July 31st, and sail for Liverpool on Aug. 4, and will arrive at Biminiport on August 10. Ten days will be spent in the Maritime provinces, and the party will

proceed to Montreal on August 21st, spending the remainder of the month in Quebec. They will arrive in Winnipeg on September 3, touch Alberta on September 6, passing straight through to the coast. On September 15 they will return to Calgary, and finally reach Edmonton on the afternoon or evening of the 18th. They will leave on the G.T.P. the following day, and sail for Quebec on the 21st.

The Conservative party would insist that the English press should always be invited.

The effectiveness of any such declaration of neutrality by the prime minister, classed Calgarians had the right to make, should still be maintained, rather than repudiated.

The meeting of the department of the provincial government will re-operate with the railway companies in the carrying on of special arrangements for the entertainment of the guests, the Canadian club taking charge tomorrow and continuing through the remainder of the week.

TO DEFEND CLAY COURT TITLES

(Western Associated Press)

Omaha, Neb., July 31.—Prominent golfers from throughout the country will compete in the Kenneth City club today and chances in practice play preliminary to competing in the annual championship tournament of the Wisconsin State Golf association.

The tournament, which has been suspended to date, will go on in development of the triple alliance.

WISCONSIN GOLF TOURNAMENT

Kenosha, Wis., July 31.—Prominent golfers from throughout the country will compete in the Kenneth City club today and chances in practice play preliminary to competing in the annual championship tournament of the Wisconsin State Golf association.

The tournament, which has been suspended to date, will go on in development of the triple alliance.

COLODO DAY IN DENVER.

Denver, Colo., July 31—Colorado Day, the thirty-fifth anniversary of the admission of the state of Colorado to the Union, was observed today as a legal holiday throughout the state. Banks and public offices were closed everywhere and in this city the customary flag raising and appropriate exercises were held in the city park.

UNCLE SAM HAS GRANTED 1,000,000 PATENTS

(Western Associated Press)

Washington, D. C., July 31.—The hundred and twenty years ago are now to the United States granted its first patent. One week from tomorrow the Patent office expects to issue patent No. 1,253,000. The last patent ever granted on a site recently purchased by the company consists of five lots at the corner of Melville avenue and 11th street, and will have frontage on North 11th street and will extend along Melville avenue for a distance of 120 feet. Construction work on the house will be commenced this summer and it is expected that the building will be completed early next year.

BRILLIANT GATHERING AT COWES

(Western Associated Press)

London, July 31.—Great interest is being centered in Cowes where the great annual regatta was inaugurated today with a race for His Majesty's Cup, and where the usual brilliant gatherings will continue until the end of the week.

LAWN BOWLING TOURE—NEY AT BUFFALO

Buffalo, N. Y., July 31.—The first annual tournament of the International Lawn Bowling association was opened today, the afternoon, at the Bowls club. Chief events programmed are the competition for the International Cup, and the Frontier consolation cup, and Scotch doubles and singles.

SIX MILLION GALLON PUMP IS PUT OUT OF COMMISSION BY BREAK IN MAIN; CITY'S WATER SUPPLY IS REDUCED

ENGINEER AT PUMPING STATION NARROWLY ESCAPES WITH HIS LIFE—BREAKING OF ELBOW ON 20-INCH MAIN RESULTS IN FLOODING OF PUMP PIT—CITIZENS MUST BE ECONOMIC WITH WATER FOR FEW DAYS.

With the breaking of an elbow in the big 20-inch water main last evening about 7 o'clock, the pit containing the six million gallon pump at the water pumping station was flooded. The engineer, Mr. Elmer Ward, was nearly drowned, an assistant narrowly escaped, and the engineer, except on the surface, was submerged in water up to his neck. He crawled an inch and a quarter pipe leading up the sidewalk and pulled himself up so that until he reached a foothold he could not get up. The water was rising rapidly, so he crawled back to the pump, which was leaking water from the city main flushed back into the pump pit. When he reached the big pump, relieved from the water pressure, he began racing and shooting a stream 20 inches in diameter the ceiling of the building was broken and the roof came down. The water ran into the pump pit.

Superintendent A. MacLean of the waterworks was working at the plant at the time and immediately set about getting the pump out of the pit. It took a long time to get the pump out.

When the big machine must be cleaned up, gone over thoroughly, and put back in commission, just how long this will take is a question.

PIPE FUSED

Fireman, M. P. Prior maintained a presence of mind and stopped the big pump long enough to get the pipe fused.

The water from the main however was pouring in and shortly the big pit, which is forty feet square, began to drop when the surface.

The man knocked him off his feet and threw him completely across the pit while the water from the pump came down on him with a mighty force and with great violence.

With such an amount of water pour-

ing into the pit, it was but an instant before the floor was covered with surging water and it was rising rapidly. How Engineer Elmer Ward managed to escape from the deluge is not exactly clear. He crawled an inch and a quarter pipe leading up the sidewalk and pulled himself up so that until he reached a foothold he could not get up. The water was rising rapidly, so he crawled back to the pump, which was leaking water from the city main flushed back into the pump pit. When he reached the big pump, relieved from the water pressure, he began racing and shooting a stream 20 inches in diameter the ceiling of the building was broken and the roof came down. The water ran into the pump pit.

As quickly as possible the valve was closed preventing the water from the pump back flowing into the pit. It is hoped to have the pump repaired and put back in commission as soon as possible.

The big machine must be cleaned up, gone over thoroughly, and put back in commission. Just how long this will take is a question.

PIPE FUSED

In order to keep the water at all the time, the pipe is cut out and what water the city may have for the next

With such an amount of water pour-

ing into the pit, it was but an instant before the floor was covered with surging water and it was rising rapidly. How Engineer Elmer Ward managed to escape from the deluge is not exactly clear. He crawled an inch and a quarter pipe leading up the sidewalk and pulled himself up so that until he reached a foothold he could not get up. CITIZENS OF ROME OBJECT TO NOISE

BECOMING VERY DIFFICULT TO FIND QUIET PLACE OF RESIDENCE IN CITY

(Globe Cable Service) Rome, July 31.—Voices are being daily raised in the Roman press against the continual version of "the Eternal City" into a bustling, noisy, modern capital. While the people of Rome are fond of quiet scenes, they protest against the further desecration of the beautiful Villa Borghese, the most charming park that any city could possess, and, above all, they protest against the proposal to run a tram down the historic Via Condotti, which tourists know better than any other street in Rome. During the last few months there have been enormous increases in the number of passengers using the tramway system; the municipality has started a new service with its own colors, red and yellow; and, as the number of passengers has thus increased, the noise has been increased also; in fact, it is becoming difficult to find quiet residence anywhere in the city. The citizens therefore segregate upon the car. Now the Via Condotti, narrow and elegant, is to be traversed by a tram, and friends of President Mazzini are well, if he unfortunately cannot see the "funam" (the smoke of the Politecnico chimney), to able to hear the "streymum" of Rome still louder than at present.

(Union Press Service) London, July 31.—Sir George Townshend appeared in a stock company for the first time in his career on the stage of the Auditorium here this afternoon, playing his old part in Augustus Thomas' play, "In Missouri," still hindered than at present.

DENY EXISTENCE OF BLACK RUST

NO COMPLAINTS HAVE BEEN RECEIVED BY SASKATCHEWAN AGRICULTURAL DEPARTMENT

Regina, Sask., July 30.—Dr. A. W. Mantle, deputy minister of agriculture, denied the report supposed to have originated with him that black rust had appeared in Saskatchewan. Mr. Mantle explained that he had said that the preceding wet weather was favorable to rust but that he had never seen any. In a matter of fact no complaints of rust have as yet been received by the department, and up to the present time eminently little damage has been reported from any source.

RUSSIA TO REFORM HER POLICE FORCE

SALARIES WILL BE INCREASED AND NUMBERS OF EXTRA POLICE MEN ADDED

(Globe Cable Service) St. Petersburg, July 31.—The minister of the interior has completed a bill for the reform of the Russian police. The bill starts from the basis that "police" are not a public service in any of the public services, namely, the universally acknowledged fact that the police services are undesirable. The minister of interior is to be chief of city police, plus a number of other functions and power appropriate to Russia, get about \$10 million a year, while the police force gets 150 a year. The police officers, and never attempt to live on their pay, indeed the cost of uniform and all other expenses are deducted. The amount pay to all self-supporting towns is sanctified a system of civil profits for the members of the Russian public service.

Raise Pay of Police.

It is to remedy this state of things that the bill proposes to raise the pay of the police. The bill provides for a minimum of about \$2,500 per year, rising to over \$3,500 for "police-execs." down to \$2,000, rising to \$150 a month for the lowest rank. The increase in expenditure of \$12,500 a year. The force is to be increased also in numbers, for while the capitals and industrial centers are to be well policed it is noted that many of the towns in various parts of Russia, as big sometimes as an European principality, are not supplied by one man and his assistant, while in some neighborhoods are ridiculous short of representatives of law and order, even in the larger neighborhood of big towns, in which case the police of the European Russia only, police of all ranks at the rate of one man per 3,000 total inhabitants, or, if the recently appointed "police" are reckoned, the number is about one to 2,000 inhabitants.

EXTRA SESSION IN TEXAS

(Union Press Service)

Austin, Tex., July 31.—The Legislature of Texas, which adjourned on July 15, is to meet again on Aug. 15, for a special session by Governor Collier to deal with appropriation measures and the subject of legislative reappointment of members of the Texas legislature assembled here today.

An Infliction of Too Much Politics

Throughout the whole history of the Dominion of Canada no more gross or flagrant disregard of public interest has ever been shown than in this matter of forcing an election on the country in the midst of harvest, at the very time when every man, woman and child in the country is engaged in a strenuous endeavor to save the crop which is the greatest that has been.

If the purpose of the conservative leaders was to rob the western farmers of their franchise, they have accomplished that purpose, and it is not going too far to say that the government has shown an altogether too great readiness to meet them when it allowed them to force the elections at the present time.

Certainly this country is being given an infliction of altogether too much politics, and an altogether too little regard for the public interest by the politicians.

An election in November might have been more uncomfortable for the stump speakers, who have to travel the country, hypnotizing the farmers with their oratory, but the farmers at least would be able to vote; and certainly the personal comfort of the war horses of the campaign should be a lighter consideration in the big scheme of things than the right of the farmer to a vote.

Prairie Farmers Lose United States Market for 1911

Not the least of the injuries inflicted upon the western country by the conservatives who forced an election in September is that the grain growers will not get the advantage of the United States market this year.

Had the Dominion government been allowed to go ahead with the reciprocity bill, the arrangement might have been perfected and put in working order in time for the marketing of this year's wheat. The bill has already gone through all the stages in the United States house and senate and requires only that Canada do her part. But parliament having been dissolved and the country having been plunged into an election, it will be impossible for the government to get around to the passing of the pact through the house before a date late in October. By that time it will be too late for grain dealers from the other side to make their arrangements and get into the market this fall.

The loss of the United States market in the very year when the Prairie Provinces, with a two hundred million wheat crop need it most, is an injury which the wheat growers will not pass over lightly.

Out of Line With The Modern Tendency

In their attempt to "centralize" the city stores department the mayor and city council will do well to see to it that they do not fall into the same error that Mr. Bouillon did when he undertook his unwieldy and absurd centralized system of accounting.

A city warehouse in which under one roof every article of city use would be handled is on the face of it the only sensible scheme, and one which would be adopted without delay as the present system—or rather lack of system—by which telephone, water and light and all other supplies are scattered about in different warehouses, is altogether unbusiness-like.

But in the handling of the supplies it is quite obvious that none but men acquainted each with their own branch of the business, could be capable of getting value for the city. To buy electrical supplies, for instance, requires an intimate knowledge of the electrical business and it is doubtful if a man not intimately acquainted with the business could even check off an invoice. The same applies to the waterworks, the telephone and the power house, and in fact, to every department of the city's business.

Possibly if the city council and commissioners provided the warehouse, allotting to each department the room the superintendent thought he required, and then left it to the auditor to work out the check-off system by which the book-keeping end could be made workable they would arrive at what is wanted quicker than in any other way.

With every railway, every large industrial institution, and every business of any importance tending toward the departmentalization of its affairs, it looks as though this "centralization" craze which has hit the city hall since Mr. Bouillon first sprang it is a little out of line with the modern tendency.

Visit of Ohio Editors Means Much to Edmonton

While the Ohio editors, who are due in the city tomorrow evening, will only remain in Edmonton for a few hours their visit is of more than ordinary importance to this city and district. Following out the line of procedure laid down by similar delegations, which have visited the city during the past three years, thousands of readers of Ohio publications will receive thousands and thousands of columns of first hand information regarding Edmonton and districts.

The members of the party represent at least one hundred newspapers and magazines which enter nearly all the homes in Ohio and in addition have numerous readers in surrounding states. The farmers of Ohio, men who settled there in the days when the country resembled the Alberta of today, have paid for their homes and are well fixed so far as this world's goods are concerned. The pioneer blood is in their veins, however, and hundreds of them are planning on emigrating to a country where they can acquire cheap land for their sons and daughters.

News articles published in their home papers will have far more

effect in influencing them to remove to Alberta than all the tons of literature which might be sent out by the provincial publicity department or the boards of trade of the different cities. They will read the papers and then if they desire further information have only to apply to the editor of their home paper, who from a personal survey of the country, can tell them what they desire to know.

It is delegations such as this that prove of great advertising value to the districts which they visit. They should be supplied with all the information which is possible to give them. It will be time and money well expended.

When Is a Woman Old?

By Dorothy Dix

The Madrid papers have been having a very enterprising discussion of the subject of a man's age and asking its readers to decide how long a man is entitled to be called young.

The answer is that you prize what a man gives you just as he can make young jealous.

Another competitor thought that a man was old when he could no longer stand up to a beautiful woman without being asked to sit down.

The answer is that a man is old when you prize him as he gets younger.

"A man is old," wrote another competitor, "when a woman kisses him with cold lips."

Of course any discussion of a man's age is purely academic. It really doesn't matter whether it's a man's physical or mental statistics, however, him and the family record, for he is likely as young as he feels, and may do as he pleases.

She, however, feels like wearing pink neckties and red waistcoats, and making love to chorus girls when he is seventy-five, he is bound to be old.

If he is a dancing and enterprising type don't ask him to parties because he has turned sixty. Age isn't a truism to him, as it is to a woman, however, no matter who she is, and when she has turned forty, come an actual reflection on her character.

She, however, feels like wearing pink neckties and red waistcoats, and making love to chorus girls when he is seventy-five, he is bound to be old.

Age is a matter of spirit and temperament and body, not of years. There are people who are supernaturally young at eighty and still more at sixty.

Yet to most of us, and especially to women, there comes some fine division here, on one side of which we are old, and on the other side of which we are young.

She, however, feels like wearing pink neckties and red waistcoats, and making love to chorus girls when he is seventy-five, he is bound to be old.

Yet to most of us, and especially to women, there comes some fine division here, on one side of which we are old, and on the other side of which we are young.

She, however, feels like wearing pink neckties and red waistcoats, and making love to chorus girls when he is seventy-five, he is bound to be old.

Age is a matter of spirit and temperament and body, not of years. There are people who are supernaturally young at eighty and still more at sixty.

Real Estate BULLETIN

The half holiday somewhat disturbed business, but there is practically no change to note, excepting the strengthening of the usual demand for Jasper avenue and trackage properties in which several deals are pending.

Some movement is taking place in Inglewood and other West End subdivisions; also in Norwood in the East End.

Houses are wanted in the West End, but terms are generally desired to be easy, as newcomers did not anticipate having to purchase, hence have come unprepared to put up large sums as initial payments.

Subdivision lands are still in good demand.

Alberta Park

The cheapest acreage in the suburbs within the same distance of P.O.

We have it.

Today's Offerings Business Properties

120 feet, corner, on Jasper Ave., East \$9,000

NEWS OF THE CITY

Dr. Mason, of 293 Jasper east, has returned to his dentistry office to his great relief.

The Royal Welsh Ladies choir will appear in Edmonton at the Empire theatre, September 29th and 30th.

A million dollar sugar beet factory will be erected at Strathmore, Alberta, next year by Calgarian capitalists.

James Elliott, and wife have returned to Edmonton after a two months' visit to their sons, John and Raymond at Newmarket.

John G. Chaffin, Sheriff of the city police force who left recently on his holidays will return to the city about the course of a few days for further work.

BODY OF EARL WELLER FOUND

After a nine days' search for the body of Earl Weller, the young man who was drowned in White Horse lake on July 21, success met the efforts of his friends to bring the body will be brought into Edmonton this morning on the G.T.P. for burial.

At the funeral, which is now being arranged, a wreath will be placed on the grave of the great and popular cowboy friends who lived at Peterborough, out, his former home.

POULTRY AND PET STOCK

The regular exhibition of the Edmonton Poultry and Pet Stock association will be held in the exhibition hall tomorrow evening at 8 o'clock.

Publicity evenings—Chas. S. Holthaus, who has the city in the course of a few days for further work.

"THE MUMMY AND THE HUMMING BIRD"

Reducing the plot of "The Mummy and the Humming Bird" to five lines, it would seem to appear that Mrs. Henderson merely turned an old dress inside out, and manufactured a "mummy" out of it.

That is true and untrue at the same time. Surely the following will sound wonderful: "Mummy, I am a mummy." A young and beautiful woman with a youthful dream and ideals of what wedded life must be, marries a young husband of middle age, but before long finds that her husband, research, does not see that his bride is plumb for his companion; she gradually drifts into the heart of another; accepting him, she is soon sought after to be rescued in the nick of time by her husband, who comes to his sense at an opportune moment.

EXHIBITION NOTES

In the craft classes, the entries for the fall fair to be held next month will be more than double the number received by the exhibition association for the fall of 1910. Saturday afternoon, the 26th, there will be 101 entries in the pottery classes, and in the course of a few days 140 additional birds will be entered.

NEW HACKNEY CLASS

An entirely new hackney class has been created in connection with the judging at the annual fair in August, by the announcement of Charles Sanderson, to the exhibition association members.

It is to be expected that the number of entries received for the gardens competition will be held in connection with the annual fair.

A unique advertisement of the Miss Townsle is to be seen in the windows of Walsh and Chambers, 1277 First street, the first floor, on Friday evening, 10 hours by 5 feet wide, showing Edmonton with the town of Mirror in the foreground by the side of Buffalo Lake which is shown as a flourishing summer resort.

EDMONTON'S TRADE.

[Continued from Page One.]

of leather work, recently removed from the store, had been placed. The German decided to "heat it." He was quickly enveloped in the darkness and has not run to earth.

At 8 a.m. today, Ward and Angus Blundell set out from town in search of the burglars, for it was suspected that both Holmes and his neighbor Constable McMillan were in the absence of Constable Metcalfe, who was mounted police, who was just then buying fresh meat to the Indians of the reserve. Mr. Blane was sworn in as a special constable and the dogs along with him to the Holstip and Smeltzer families, which are possessed of the finest kept harnessed wire fences in the country.

After a quarter of a mile from Smeltzer's barn, the party stumbled upon twelve pounds of wire, while a search of the barn, fifteen minutes later, revealed a quantity of \$150 worth of articles which is alleged to be stolen. Neither Holmes nor Holmes were at home so he and his son lay in wait. Mr. Blane and his son, in full force, called for Smeltzer or Holmes to appear, in the early morning he was joined by Constable McMillan, who was also present, and the two constables traversed the country in search of the missing farmers.

Suddenly Smeltzer appeared in the middle of a field, armed with a shotgun and a pistol, and, after shooting twice, had probably made his escape his hide was not followed him up, and leveling a 38 calibre revolver, he shot himself in the head.

Smeltzer continued on his way and Special Constable Blue fired at him over the farmer's head. Even though he was mortally wounded, he still ran, shouting blue murder down with a shot in the right leg. Smeltzer was desperate. Flushing a horse to drive him to safety, he was forced to give up.

"I know the kind of gun you have, you can't go me any harm," shouted Blue, and the other decided that the gun was up.

Smeltzer was sent up for trial on Thursday, and is now in the guard room at Fort Saskatchewan. He is to be given a preliminary hearing on a number of additional charges this week.

INQUIRY INTO BEER INDUSTRY

Under Press Service.

Washington, D.C., July 31.—With Albert to ascertain just what ingredients the brewers of the United States use in their beer, a congressional reporter and a stout, series of important hearings was commenced in this city today by the House committee on investigation of agriculture and trade.

A resolution just issued which tended to increase the cost of this year was for the new buildings and additions at the exposition grounds. Three new buildings and one addition have started which represent an expenditure of \$22,400, according to estimate on the part of the permit.

THE WEATHER

Washington, July 31.—A series of sunshower days have occurred in nearly all districts of the prairie provinces and the weather has been moderately warm and in Saskatchewan cool.

Friday—Fair, with a slight breeze. Saturday—Fair, with a slight breeze. Sunday—Fair, with a slight breeze.

Forecast—Edmonton: A few light showers but most fair and not much change in temperature. Tuesday—Fair, with a slight breeze. Wednesday—Fair, with a slight breeze. Thursday—Fair, with a slight breeze. Friday—Fair, with a slight breeze. Saturday—Fair, with a slight breeze. Sunday—Fair, with a slight breeze.

THE EDMONTON CAPITAL

PIONEER STARTS ON LONG JOURNEY

JAMES GREEN, WELL KNOWN CON-
TRACTOR AND BUILDER DIES
AT NAMAYO AVENUE HOME

After an extended illness from Bright's disease which defied all medical skill, James Green of this city, pioneer contractor and builder of the first hotel and residence in the old diamond Saturday night at his home, 651 Nanay Avenue. A wife, four children, and two sisters, a host of nieces, nephews, and friends, paid a final tribute to the man who had hardly reached the 57th milestone in life's journey. The brothers are W. G. Green of Wimipeg, Chas. Green of Brandon, and George and Fred Green of San Francisco, and Thomas James Green of Shebburton, Ont., Miss Margaret Green and Mrs. William Sherman of Montreal, are the surviving sisters.

James Green was approaching 57 years of age. He had been a prominent citizen of Edmonton for 40 years, and his wife had been a resident of the city for 30 years.

He was a member of the First Presbyterian church, and a member of the Masonic Lodge.

James Green had a large family.
